

Car Care

RIFRAF DETAILING

Caring for your coating

- **Do Not** let it stay wet for the first 24 hours after coating - If it does wipe it dry with a microfiber towel as soon as possible
- **Do Not** wash the coating with soap for the first 7 days after application

Washing Your Car

Snow Foam - Preferred Method

- 1 - High Pressure wash your whole car
- 2 - Spray your wheels with wheel cleaner and agitate
- 3 - High Pressure rinse your wheels
- 4 - Use a foam lance to apply your foam
- 5 - Wait 5 - 10 minutes
- 6 - High Pressure wash again - Unless your car isn't coated or is extremely dirty go to last step
- 7 - Using 2 buckets and a microfibre mitt, fill 1 bucket with clean water and another with water\soap mix
- 8 - Dip your mitt into the soap bucket wash a small area of your car, whilst remembering to use the **TOP DOWN** method (Wash from roof down to middle of car all around then from middle down all around) **DO NOT** let any of the soap dry on your car
- 9 - Rinse the pad in the clean water bucket between areas you are washing
- 10 - Dip the mitt back into the soap and do your next area
- 11 - Repeat the process - SOAP - CAR - CLEAN BUCKET - SOAP - CAR - CLEAN BUCKET - SOAP ... **NEVER** go from the car directly to the soap bucket
- 12 - Dry with a clean micro fiber drying cloth

3 Bucket Technique

- 1 - Rinse car – ensuring that you remove all loose dirt from car
- 2 - Using 2 buckets, Fill 1 with a quality car shampoo and 1 with clean water only.
- 3 - Using a clean micro fibre wash pad, dip it into your shampoo bucket and wash a small area of the car. ensure that there is sufficient soap on the wash pad. Use the **TOP DOWN** method, wash your car from the roof down, never let any part dry before rinsing
- 4 - Rinse wash pad in the clean bucket
- 5 - Dip the wash pad into the shampoo again and wash another small area of your car.
- 6 - Repeat the process – Soap – Car – Clean Bucket – Soap – Car – Clean Bucket – Soap – Car.... (Replacing the clean water in then rinse bucket regularly)
- 7 - Rinse Car again
- 8 - Using a 3rd bucket prepare your wheel cleaning product and clean your wheels then rinse them
- 9 - Dry with Clean Micro Fibre Cloth

What NOT to do

- Use 1 bucket wash method
- Never put sponge for wheels in the paint bucket
- Use any products that are NOT designed for cars
- Use automated car washes
- Use manual car wash foam brush (If you MUST, then high pressure clean the brush first)
- Scrub at marks or dirt
- Apply polish to a coated car
- NEVER use hand polish on a car!
